

Easy YouTube Cash Checklist:

This checklist is to make sure that you have everything in order for your YouTube videos, as far as optimization, indexing, ranking, etc.

Checklist Item #1: Title, Tag, Description

Be sure to have your keywords in your video title. If your keyword is "Get Cash For Surveys" then your video title should include that phrase in it, such as "Get Cash For Surveys Online - Start Today!"

The tags are another spot for you to add keywords and you can add many. Simply separate them with a comma and you can add tons of great keywords in there.

The description of your video is another item of text that search engines (like Google) will crawl when someone searches for a specific keyword phrase.

You'll want to include your keyword phrase within your description obviously so that you have content on your page with your keywords that you're targeting.

The protocol is to treat each video as if it were a mini website. Since each video will have its own unique URL, you can treat it as though it's a sort of landing page and optimize it as such.

Checklist Item #2: Ping Videos

You'll want to be sure to ping your videos at:

<http://bulkping.com>

Checklist Item #3: Ping Channel RSS

And ping the RSS feed of your Channel at:

<http://www.bulkping.com/free-rss-submit-online/index.php>

The RSS URL will be:

<http://gdata.youtube.com/feeds/base/users/<YOUR CHANNEL NAME>/uploads>

Checklist Item #4: Comment on Other Videos

When you comment on other videos on YouTube, that gives you a back link to your channel, since your avatar will have a link that goes to your YouTube channel.

Checklist Item #5: Index Your Videos Fast

You can index your videos FAST at the following places:

1. <http://www.submitexpress.com/free-submission.html>

(This will index your video on 70+ search engines for FREE!)

2. <https://www.google.com/webmasters/tools/submit-url?continue=/addurl&pli=1>

(This is where you can add any URL to index on Google quicker. You will put your video URL's in here, one at a time)

3. You can also submit your URL's to Bing for quicker indexing here:

<http://www.bing.com/toolbox/submit-site-url>

4. You can also ping your URL's at:

<http://pingler.com>

<http://pingomatic.com>

Keep in mind, you can index your WEBSITES TOO using the above tools!

Checklist Item #6: Get Views (AddMeFast, Etc.)

Use sites like <http://addmefast.com> to "swap views" with other REAL people. This will allow you to get real, organic views that will help with the ranking of your videos, even if the views don't amount to any sales or conversions (since it won't be targeted).
